ANZAAS is not a QANGO.

It's a TANGO.

A Totally Autonomous Non-Government Organisation

Because ANZAAS is scientific, respectable and attached to no sectional interests other than the science/technology community as a whole, and publishes an objectively edited journal, it is widely believed that we must be part of the Government, or must at least be substantially subsidised.

When we tell people that this is far from being the case — that we receive no federal funding whatever — they generally ask, 'Then where does the money come from?'

When we tell them it mainly comes from membership subscriptions, they are surprised. When we tell them we're finding it very difficult to break even, they are not surprised.

This message is not to ask for money, or to persuade more people to join (although those who are reading this at a library or via a circulation list might think about it). It's just to set the record straight.

ANZAAS is a Totally Autonomous Non-Government Organisation.
